

Welcome to the Mukurtu 4 User Manual

Please note that this user manual is still in development!

Mukurtu 3 documentation is available at support.mukurtu.org and you can contact support@mukurtu.org with any questions.

All Mukurtu support articles and training resources are posted to our main support site at support.mukurtu.org. These are free.

We provide basic training and troubleshooting through web conference, phone call, or email. We can discuss your particular project needs, how best to configure your Mukurtu CMS site, provide demonstrations of all of Mukurtu CMS' features and tools, and help with limited troubleshooting. We can help you configure and customize your Mukurtu CMS site within the options provided by the Mukurtu CMS web interface. We offer limited support for Mukurtu CMS sites more heavily customized at the Drupal or code level that deviate from the core Mukurtu code.

Mukurtu CMS, Mukurtu Support resources, and all materials on mukurtu.org are distributed under the terms of the [GNU General Public License version 3](https://www.gnu.org/licenses/gpl-3.0.html) (or "GPLv3"), which means anyone is free to download and share them with others.

Using the Mukurtu 4 user manual

User roles

This call out specifies which user role(s) can take the actions defined in an article.

Tip

This call out provides helpful additional information of context.

Requirement

This call out notifies you that there are requirements or prerequisites before you can take the actions defined in an article.

Warning

This call out notifies you that there is essential information or particularly risky actions defined in an article.

When the manual states that you can go directly to a page and provides a partial path, you can append that path to your site's base URL to go there. Eg:

- If your site is `https://my-mukurtu-site.com`
- And the manual says you can "[...] go directly to the dashboard at `/dashboard` "
- You can go to that page at `https://my-mukurtu-site.com/dashboard`
